

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listing, of claims in the present application.

LISTING OF CLAIMS:

Please amend the claims as follows:

1. (Original) A floor-mopping device, comprising:
 - a handle having a longitudinal axis;
 - a supporting body to which the handle is connected, the supporting body being rotatable about the longitudinal axis of the handle;
 - at least one flexible mopping element suspended from the supporting body in pendulum fashion; and
 - means for suppressing canting of the supporting body relative to the handle.
2. (Currently Amended) The floor-mopping device as recited in claim 1, wherein the means for ~~supressing~~ suppressing canting of the supporting body comprise a one of a columnar or and conical guideway. A1 6.36
3. (Previously Presented) The floor-mopping device as recited in claim 1, wherein the supporting body and the handle are connected by a swivel joint.
4. (Currently Amended) The floor-mopping device as recited in claim 1, further comprising:
 - a counterstop; and
 - a handlestop, wherein the handle has a turning range that is limited in at least one direction by a the handle stop which can be forced into engagement with a the counterstop located on the supporting body.
5. (Currently Amended) The floor-mopping device as recited in claim 2, further comprising:
 - a counterstop; and

a handlestop, wherein the handle has a turning range that is limited in at least one direction by a the handle stop which can be forced into engagement with a the counterstop located on the supporting body.

6. (Currently Amended) The floor-mopping device as recited in claim 3, further comprising:

a counterstop; and

a handlestop, wherein the handle has a turning range that is limited in at least one direction by a the handle stop which can be forced into engagement with a the counterstop located on the supporting body.

7. (Currently Amended) The floor-mopping device as recited in claim 6, wherein at least one of the stop and/or and the counterstop are adjustable in the circumferential direction.

A1
8. (Currently Amended) The floor-mopping device as recited in claim 7, wherein at least one of the stop and/or and the counterstop are disengageable ~~or removable~~.

9. (Currently Amended) The floor-mopping device as recited in claim 3, further comprising:

a journal, wherein the swivel joint comprises a sleeve, affixed to one of the handle or and the supporting body, which surrounds one of a the journal of the supporting body ~~or and~~ of the handle ~~in at least one partial area~~.

10. (Currently Amended) The floor-mopping device as recited in 6, further comprising:

a journal, wherein the swivel joint comprises a sleeve, affixed to one of the handle or and the supporting body, which surrounds one of a the journal of the supporting body ~~or and~~ of the handle ~~in at least one partial area~~.

11. (Original) The floor-mopping device as recited in claim 10, wherein the journal is hollow.

12. Withdrawn from Consideration by March 21, 2003 Office Action.

13. Withdrawn from Consideration by March 21, 2003 Office Action.

14. (Currently Amended) A floor-mopping device, comprising:

a handle having a longitudinal axis;

a supporting body to which the handle is connected, the supporting body being rotatable about the longitudinal axis of the handle;

at least one flexible mopping element suspended from the supporting body in pendulum fashion; and

an arrangement for suppressing canting of the supporting body relative to the handle wherein the supporting body and the handle are connected by a swivel joint and ~~The floor-mopping device as recited in claim 3, wherein the swivel joint forms a component of the handle, and is detachably secured to the supporting body.~~

A: 1
15. (Original) The floor-mopping device as recited in claim 10, wherein the swivel joint forms a component of the supporting body, and is detachably secured to the handle.

16. Withdrawn from Consideration by March 21, 2003 Office Action.

17. Withdrawn from Consideration by March 21, 2003 Office Action.

18. (New) A floor mop comprising:

a handle connected to a supporting body that has at least one flexible wiping element hanging from the supporting body in a pendulous manner, wherein the supporting body is able to be rotated about an axis which extends in parallel to the longitudinal direction of the handle, and

an arrangement for suppressing a tilting of the supporting body with respect to the handle, the arrangement being formed by one of a columnar or conical guiding device.

6.36
